WARNING

1. Use only TOKEN brand carbon-rim specified brake pads on rims with carbon fiber brake track. Use other brake pads could degrade braking performance and may lead to unwanted character such as noise and heat accumulation, as well as serious injury of rider.
2. Over tensioning spokes and exceeding maximum inflation pressure could cause unseen damage. Note that overly inflated tyres don't necessarily have lower rolling resistance, and may have inferior traction!
3. Discontinue use of rim immediately if the brake track is worn, deformed (carbon) or the wear indication dots disappear (alloy).
4. Mounting clincher tyres on tubeless-ready rims could take more effort than on regular rims. Take great care not to damage any part of the rim with tyre lever! Applying mild soap water or tyre sealant on rim and tyre bead could make tyre installation easier.
5. Make sure your tyre-and-wheel combination meets ISO 4210-6 Safety Requirement regulation - there should always be a clearance no less than 4mm between the tyre and the frame, as well as other components such as brake caliper.
6. Failure to follow the conditions listed above may result in 2-year warranty being voided. Contact your local dealer or see the TOKEN website for details. -www.tokenproducts.com-
